

AURIMAS ALIŠAUSKAS

Full-Stack & AI Developer

PHP • TypeScript • AI Integrations • Custom Systems

+370 670 06657 • aurimas.alisauskas@yahoo.com • linkedin.com/in/aurimas-alisauskas

TECH STACK

CORE DEVELOPMENT

PHP (OOP) · JavaScript / TypeScript
SQL / MySQL · REST APIs
Backend logic & integrations
HTML · CSS / SCSS

FRAMEWORKS & PLATFORMS

Next.js · React
WordPress / WooCommerce
Laravel (working knowledge)
GSAP · jQuery

AI & AUTOMATION

OpenAI API / LLM integrations
AI-powered content workflows
AI-assisted development
Automation & data processing

WORKFLOW

Git / GitHub · CI/CD
Cloudflare · D1 · SSH
Laravel Forge · Jenkins
NPM · Gulp · Valet
Jira · Agile / Scrum

LANGUAGES

Lithuanian — Fluent
English — Good

EDUCATION

Kaunas Coding School
Programming basics course · 2018

High School of Aleksandras Stulginskis
Engineering of machines and technologies · 2006–2010

PROFILE

Full-Stack Developer with 8+ years of experience building web applications, e-commerce platforms and custom business systems. Strong background in PHP, JavaScript, TypeScript, databases, API integrations and modern web technologies, including React and Next.js.

Currently focused on full-stack engineering, automation and AI-powered functionality, including OpenAI API integrations and automated content publishing workflows. Experienced across architecture, backend logic, frontend development, debugging, optimization and deployment. Combines practical engineering thinking with deep WordPress / WooCommerce expertise.

EXPERIENCE

Freelance / Contract Development — 2026 – Present

Full-Stack & AI Developer

- Design and build custom web applications, business platforms and e-commerce systems using PHP, JavaScript, TypeScript and Next.js.
- Develop API integrations, database-driven features, business logic and automated workflows, including an OpenAI-powered content publishing system.
- Use AI-assisted engineering for architecture, implementation, debugging, refactoring and optimization; manage deployment and ongoing improvements.

Bright Projects — 2024 – 2025

Full-Stack Developer

- Worked with PHP, JavaScript and Laravel-based applications, developing integrations, business logic and interactive functionality.
- Managed Git-based deployments and environments with Laravel Forge, SSH and Cloudflare; applied AI-assisted development and performance optimization.
- Built custom WordPress / WooCommerce themes, plugins, Gutenberg blocks and API integrations.

Tandemo Sprendimai — 2022 – 2024

WordPress Developer

- Developed custom PHP-based WordPress and WooCommerce functionality with JavaScript, AJAX, Gutenberg, ACF and BEM.
- Worked with API integrations, code reviews, Jira and SEO / performance improvements.

ITMA LT — 2019 – 2022

Full-Stack Developer

- Built custom websites and e-commerce solutions using PHP, JavaScript, SCSS, Bootstrap and Git.
- Worked across WordPress, PrestaShop, OpenCart and ASP.NET / nopCommerce.
